### Karwisch earns The Circuit scholarship

Dan Karwisch, a senior at Badin High School, has been awarded a \$1,000 college scholarship by The Circuit, the voice of Cincinnati's information technology community.

Karwisch is the son of William and Kriste Karwisch of Hamilton and a graduate of St. Peter in Chains School. He plans to attend Miami University and major in computer science.

"Dan has been an outstanding student in our information technology program and is very well versed in various computer applications and Web design," said David Gretz, the computer tech teacher at Badin. "His skills are very much deserving of this scholarship."

Karwisch was one of five area students awarded a \$1,000 scholarship to further their pursuit of a degree in information technology at area universities. The scholarship money is raised by sponsors and participants in The Circuit's annual golf outing.

"Each year about this time, we have the great opportunity to make it a bit easier financially for five local IT students to further technology education," said Jim Cunningham, president of The Circuit. "We have a great mix of students this year representing talented high school IT programs and current universities."

The Circuit is an information technology association representing the Cincinnati and Northern Kentucky region. It is dedicated to raising awareness for the region's growing IT community by providing support and services for local technology professionals, companies and institutions.
